What Antibody Response Level Protects Against COVID-19 Death?
Oct 05, 2021 · In a study of patients with COVID-19 being treated in intensive care units, people who mounted only a low antibody response against the SARS-CoV-2 virus faced a higher risk of dying. The study, which is published in the Journal of Internal Medicine, also found that patients with strong antibody responses against the virus had low levels of viral RNA in their blood.
